### EGYPTIAN ANTIQUITIES—THE WAY COLLECTION.

THE Way collection of Egyptian antiquities was formed in Egypt by the late Mr. Robert Hay, of Linplum, East Lothian, Scotland, between the years 1828 and 1833. It was sold after his death, and was presented to the Museum in June, 1872, by Mr. C. Granville Way, of Boston.

The following quotation from a letter written about the collection by Mr. Samuel Birch, Curator of the Egyptian antiquities at the British Museum, is here inserted, as showing his high appreciation of it, and as offering a concise description of its contents.

Mr. Birch writes: "The Hay Collection comprises numerous specimens of each division of Egyptian antiquities, illustrative of the arts, manners, and civilization, and of the Pantheon, civil life, and funeral rites of ancient Egypt. Its chief strength is its mummies and coffins, some of which are well preserved, and all would be valuable and important additions to any museum which does not possess similar specimens. Besides these, it is remarkable for its number of small objects, such as scarabæi, amulets, sepulchral figures, canopic

vases, stamped cones, and the usual specimens found in Egyptian collections. It is such a collection as the British Museum would gladly have purchased before it was provided with Egyptian antiquities of the smaller kind."

Several fine pieces of sculpture have recently been added, the gift of the Hon. John Amory Lowell, Miss Lowell, and the heirs of the late Francis C. Lowell. They were collected in 1835 by the late John Lowell, founder of the Lowell Institute. They date from the XVIII and XIX dynasties, between 1700 and 1300 B. C.; and it is to this period, probably, that the finest of the mummy cases and a large portion of the objects in this Museum belong.

It was the period of Egypt's greatest magnificence, though its art had sensibly fallen away from the truth and simplicity that had characterized it in the days of the pyramid builders (between 4000 and 3000 B. C.). None of the art of that day, excepting, possibly, one piece of stone cut in relief (Case S), is to be found in this collection.

After the conquest of Egypt by Alexander, B. C. 332, Egyptian was to a slight degree influenced by Greek and afterwards by Roman art; an instance is given in the painted mummy coverings of Case E. Later yet, Christian symbols began to appear, as may be seen upon some of the terra cotta lamps of Case V.

---

In the centre of the room are two cases containing MUMMIES. Other mummies, with their coffins, are ranged against the wall.

The immortality of the soul was a fundamental doctrine of the Egyptian religion. It is probable that, after a long period of probation, the soul was expected to return to the body, and hence originated the habit of embalming. This custom has obtained among other people, but has nowhere been held in such esteem, or carried out so perfectly, as with the Egyptians.

There were various methods of embalming, according to

the taste and wealth of the friends of the deceased. That it was done with skill is attested by the preservation of these bodies for over three thousand years. During the process the viscera were taken out, and after a careful preparation were either returned to the body or placed in four jars such as are displayed above the wall cases. After embalmment the body was wrapped in bandages of fine linen, which in some instances have measured over one thousand yards in length. The bodies in these cases have been unrolled, but specimens of the very careful method of bandaging can be seen on the mummies of animals in Case C. Among these bandages, and but rarely immediately against the body, were placed numbers of amulets and emblems, such as may be seen in Cases K and L; often they were of gold or silver. To get at these a mummy is generally unrolled and searched as soon as found. After bandaging, it was placed in a stiff form or cartonage, made of linen cloths, cemented and tightly pressed together and fitted to the body while yet moist. The cartonage was then gayly painted.

The body thus enveloped was placed in one or two coffins, specimens of which, in wood, can be seen against the walls. Sometimes these coffins are of stone—sarcophagi; fragments of the lid of one may be seen on the floor.

The faces on the cases and cartonage, when of women, are painted yellow; of men, red.

---

**CASE A:-**

No. 1 is a fine specimen. **MUMMY OF ANCHPEFHIR, A LADY OF RANK,** face gilt. On the second line beneath the hands is a double picture of the deceased pleading her cause before Osiris, who sits as judge, holding his emblems of dominion, the crook and whip. She is supported by Truth, wearing her ostrich feather. A large portion of the Egyptian Pantheon is displayed beneath. Near the feet, on the right, is Hathor in her sacred tree, pouring out to the deceased the water of life.

The inscriptions at the sides have been translated by Pro-

essor Paine. One of them reads: "O Sun! when thou goest forth, beautiful out of the East, beating down with thy rays upon the twin lands of Egypt, ah! give thou to this lady thy beams, making thine eyes to hover over her, and when thou guidest thy barge into the presence of Osiris give thou the waters of Anres to Anchpefhir."

The two wooden cases of this mummy are placed against the wall on the right; the outer lid is wanting.

#### **CASE B:—**

No. 4, another fine specimen. It is of a man, bearded. Its inner coffin, a fine piece of work, though injured, stands between Cases F and G. On the left on entering stands a mummy in its cartonage, in both of its cases. The lid of the outer case on the right, of the inner on the left. Through some accident the painting of the cartonage is obscured by melted bitumen.

#### **CASE C:—**

MUMMIED HEADS, SKULLS (one of these half filled with bitumen). A MUMMIED HAND, delicate, well preserved, with a ring on the fourth finger. MUMMIES OF ANIMALS; of the cat, dog, cynocephalus—ape, hawk, ibis, etc.

#### **CASE D:—**

FRAGMENT OF A MUMMY CASE with nine lines of very finely-executed hieroglyphics. The mummy is represented as laid on a funeral bier; above hovers the figure of a bird with human head, representing the soul returning to reanimate the body. Beneath are the four vases, such as are seen above the case, to hold the viscera.

Other fragments of coffins, cartonage, etc.

#### **CASE E:—**

Pieces of MUMMY CLOTH of various dates and quality, some inscribed with hieroglyphics; the painted ones of late date. A fine specimen of the ROBE OF JUSTIFICATION,

represented on the wooden tablet, No. 548. It is over sixteen feet in length by six feet nine inches wide, with a fringe. It was supposed to be worn in the trial after death, before Osiris.

A LONG MITTEN, with a blue border, a piece of fine linen fabric.

A BEAD NET-WORK containing a human face, a winged scarab, a winged deity, and the four genii, once placed on a mummy of the XVIII dynasty.

---

**CASE F:-**

FACES FROM MUMMY CASES; others are suspended on the wall near by. The expression of some is excellent. One in hard wood, with glass eyebrows and eyes inserted, gives the pale brown complexion of the modern Egyptian. This is of admirable execution, perhaps a portrait.

FIGURES OF HANDS from mummy cases ; of BEARDS ; two show the mode of plaiting in shape of the letter J.

FIGURES OF THE SOUL, a bird with human head.

Set of the GENII OF AMENTI, in wax. The human-headed was Amset, the carpenter; the monkey-headed, Hapi, the digger; the jackal-headed, Duamatef, the painter; and the hawk-headed, Kebhsenuf, the bleeder. These little figures were, perhaps, put inside the body.

Various PECTORAL TABLETS placed on the chest of a mummy.

Figures of MUMMIED HAWKS.

---

**CASE G:-**

A number of SEPULCHRAL CONES AND CYLINDERS OF BRICK with hieroglyphics. Some of these may have served as stamps for the seals put on doors of granaries, etc., as at the present day in Egypt. Others probably marked the spots where bodies were placed. While the richer were buried in rock-cut tombs, immense numbers of the poorer classes were placed in the débris at the foot of the hills, and here these cones are found in great profusion.

**PAPYRI.** Only fragments of Egyptian manuscripts can here be shown. They are portions of the Funeral Ritual, or Book of the Dead. A vignette on one shows a mummy drawn on the funeral sledge, with a woman weeping over it. A modern specimen of the papyrus reed simply sliced, without preparation, is also shown. Also several of the reeds grown in this city.

---

#### **CASE H:-**

**FUNERAL TABLETS,** placed in the tombs, generally inscribed with the name of the deceased and an enumeration of his gifts, with prayers to Osiris, etc. The suppliant usually stands before an altar on which is placed a lotus flower and other offerings. Behind the altar, one or more deities. Osiris, 541; Osiris and Isis, 548; Osiris, Isis, and four Genii of Amenti, 543 and 544. The suppliant often wears the white robes of justification, No. 548, a specimen of which can be seen in Case E.

550 is of better workmanship; here the offering is made by a priest wearing his robe of office, a leopard-skin. Half only is preserved.

---

#### **CASES I and J:-**

**MUMMY FIGURES** in stone, terra cotta, and porcelain. These are found in great numbers in the tombs, placed there, perhaps, on the day of the funeral by friends and relatives. They represent the deceased with legs and arms swathed, as when mummied after death. Generally an extract from the Book of the Dead is inscribed in front; often the name and occupation of the deceased. The dead carries in either hand a hoe and a pick, and over his shoulder a bag of seed (one figure is turned to show this). Part of the work of his time of probation in the after-life was to cultivate the fields. 706 is worthy of examination,—a mummy figure of the style of the XIX dynasty, the face lost. Beneath the crossed hands is a figure of a bird with human head. It is emblematical of the soul, either just leaving, or returning to reanimate the body.

**CASE J:-**

MUMMY FIGURES, in wood, answering the same purpose as the stone and porcelain. Often they are gayly painted. Some are placed on pedestals on which also the wife kneels before her husband, No. 411. Often in cavities in these pedestals, Nos. 414, 415, etc., were placed papyri. Nos. 381 to 387 were found in the tomb known by the name of Belzoni's, being that of Seti I (Oimeneptah), and bear his cartouch (1458 B. C.). Those with aprons carved in folds generally date from the XVIII or XIX dynasty. By one is placed a lock of hair found with it in the tomb.

---

**ABOVE THE CASES:-**

A NUMBER OF SEPULCHRAL VASES, intended to hold the viscera of the person in whose tomb they were placed. A complete set consists of four, the covers bearing the heads of the four Genii of Amenti (the Egyptian Paradise), human, of the ape, jackal, and hawk. They are inscribed with the name of the deceased and of the genius protecting the special organ embalmed within. A fine set in alabaster is placed over Case II. It dates from the time of Aphries, the Pharaoh Hophra of Jeremiah, 590 B. C. The covers are in this set all human-headed.

---

**CASE K:-**

DIVINITIES.—The figures of divinities are named in the case. Especially worthy of notice for beauty of execution, are the figures of Isis and Ma (Thmei), in lapis lazuli, and of Amun in porcelain.

AMULETS, EMBLEMS.—These are found in great numbers in the mummy coverings; most of them are in porcelain, others in cornelian, lapis lazuli, and other stones. The name and significance are given.

FIGURES OF ANIMALS.—Of the monkey, ram (one with four heads), cat, bull (some tied up for sacrifice), crocodile, hawk, pig, lion, dog, frog, rabbit, of fish, of the Phœnix, hedgehog, scorpion, and calf.

**CASE L:—**

**SCARABÆI.**—The common beetle, from the very curious method in which it lays its eggs, became with the Egyptians a favorite symbol. Taking a morsel of mud or dung, and depositing on it her eggs, the beetle then fashions it into a perfect sphere, and pushing backwards, rolls it to a hole, where she buries it, leaving the sun to hatch the eggs into life.

The Egyptians supposed that there was no female, that it was the male insect solely thus reproducing his kind. Hence, it became the symbol of Creative Power,—of the world holding the seeds of life, and of the sun.

Scarabs are found in the tombs and among the ruins in immense numbers. Besides the pure symbolic use, in which sense they were placed with expanded wings on the breasts of mummies, they were used often as ornaments to necklaces and in great numbers as signet rings, in which case they bore inscriptions of various sorts, often the name of the reigning king, more frequently that of a god, or some attribute of one. Those of larger size often recorded events of public or private interest. Some of these, in hard stone, are remarkable for their cutting.

Several scarabæi and other objects bearing the names of kings are grouped together, giving a series of dates. The oldest is inscribed with the name of Ra-tet-ka, of the III dynasty, between 3000 and 4000 B. C.

**SIX SIGNET CYLINDERS** of Stone. The seal was made by rolling them over wax. The translations appended are by Prof. T. O. Paine.

---

**CASE M:—**

Contains a number of **BASKETS**, worked of the coarse hal-féh grass and of palm, one of papyrus, a **QUILTED BALL**, various **SANDALS**, boots of leather, etc.

---

**CASE N:—**

**SCRIBES' PALETTES**, with brushes. They usually have a long cavity for the reed, and two round ones, one for red and

one for black pigments; both were in constant use, as the papyri show. In the Funeral Ritual, or Book of the Dead, the titles of chapters and directions for use were usually written in red. The custom still prevails in ecclesiastical books, and has given rise to the word *rubric*.

BOTTLES, for holding the stibium with which to paint the eyelid and brow.

WOODEN COMBS, BRONZE LADLES, DRAUGHTSMEN, SPINDLES, etc.

---

**CASE O:—**

STOOL, LEGS OF A CHAIR, ORNAMENTS OF FURNITURE, PILLOWS, supporting the back of the head, BRONZE MIRRORS.

---

**CASE P:—**

RINGS of great variety, fragments of NECKLACES and GEMS. One scarab of green jasper, of the date of Thothmes III (B. C. about 1591), is especially worthy of notice for the beauty of its cutting.

---

**CASE Q:—**

Various FIGURES of men and animals. Those in wood in various attitudes, dancing, standing, and squatting. In the men the flesh is painted red, in the women yellow. These are found in great numbers in one quarter of the tombs at Thebes. The group 430 and succeeding numbers were found on the little model of a boat. It represents the captain and sailors seated or squatted for a talk.

488. That of a GIRL is curious as giving the style of dressing the hair like the modern fashion of Nubia. The large ear-rings are also still seen there.

**CASE R:—**

Contains various specimens of GLASS, opaque and transparent; beads, head of an Asiatic, etc.; also an almost unique collection of Arab coins, in glass, of the 10th century.

**CASE S:—**

**FRAGMENTS OF SCULPTURE.** — On upper shelf, head of an Asiatic captive; a hand, life-size, in granite, holding the crux ansata, emblem of life; on middle shelf, a number of typical Egyptian faces and heads, and a fragment cut from the wall of a tomb, a figure holding an oar among papyrus reeds, probably part of a fowling scene. It is of the best style of Egyptian sculpture, and may date from the time of the pyramid builders.

**CASE T:—**

**A DOLL, IVORY FIGURES, BRONZE MINIATURE BUCKETS, HOE, etc., and several small WEIGHTS.**

**CASE U:—**

A fine specimen of the cutting of HIEROGLYPHICS from the wall of a tomb; a GREEK TABLET bearing the name of Athanasius, probably hung in some church; various bits of PAINTED SCULPTURE; in the centre of the middle shelf, mouth and nostrils red, on a yellow ground, are portions of a portrait of Seti I (1458 B. C.), cut from the wall of Belzoni's tomb; on lower shelf a number of stoppers of funeral jars.

**CASE V:—**

**TERRA COTTA LAMPS.** — All of late date, chiefly interesting as showing the succession of different faiths. In the Greek lamps Minerva and Cupid (1086) have driven out the Egyptian gods, to give place in turn to inscriptions to Christ (1090).

1085 is a curious instance of the adaptation of the old symbolism to the new faith. The Latin cross decorates the centre; on either side are Egyptian crosses, symbols of life.

**CASES W TO Z:—**

**VASES, BOTTLES, TAZZE, AND JARS** of stone, terra cotta, and vitreous ware. The short, full ones are generally meant to hold stibium or kohl, with which the women were wont to paint the eyelid and brow. The grotesque faces on some are noticeable; in Case Z are several of Greek origin.

**ABOVE THE CASES:—**

Are various STAVES AND Bows.—A long staff was usually carried by the Egyptians. The top was often in the conventional shape of the lotus flower; two such can be seen in Case O. Often they were ornamented with a short, projecting branch, and if nature had not supplied it, an artificial one was fastened on; instances of both kinds can be seen on the wall. They are of hard wood, carried the heavy end down, and are of length much greater than the canes of the present day. Often the owner's name is inscribed. Frequent mention of staves is made in the Bible, both literally and metaphorically, showing constant use of them. The bows are generally in good preservation; the largest is sixty-three inches in length, and about one and three eighths in diameter at largest part.

---

**SCULPTURE:—**

In the centre of the room the black granite figure of PASIIT, lion-headed, bears the cartouch of Amenophis III (about 1500 B. C.). The heavy blocks of red granite are probably the fragments of a throne. On one is placed a colossal head of a king. On the block between the windows can be seen a king offering to Khem, and part of a procession of priests bearing an ark; on the other is the head of Amun, deeply cut, and at the base is placed the half figure of a king in the attitude of making an offering. The blocks are fine specimens of stone-cutting, dating, probably, from the XIX dynasty.

The fragments of a lid of a sarcophagus are admirably cut in green basalt.

On the walls are two capitals of columns in sandstone, giving the lotus and papyrus forms; they are probably from Philæ.

---

**CASTS:—**

The colossal figure is that of AMENOPHIS III, KING OF EGYPT, about 1500 B. C. The original, of granite, is in the British Museum. The placid, benevolent expression is characteristic of Egyptian art. He was the Memnon of the Greeks.

On the walls are busts of  
THOTHMES III, B. C. about 1600.  
RAMESES II, B. C. 1407.  
SETI II, B. C. 1300.

The great bas-relief represents SETI I (B. C. 1458) attacking the fortress of Kanana in Palestine. Cast by Dr. Lepsius from the northern wall of the Temple of Karnac. It was under the reign of his successor, Rameses II, that Moses was in Egypt.

BAS-RELIEF. NECTANEBO making an offering, B. C. 378.  
The smaller casts are,—

AM-EN-EM-NA, a functionary of the XII dynasty, about 2800 to 2500 B. C.

AMENOPHIS IV, about 1480 B. C.  
PSAMMETICHUS II, B. C. 595.

HEAD OF LION, of the date of Amenophis III.

THE ROSETTA STONE, inscribed in Hieroglyphic, Enchorial, and Greek characters, was the key to the interpretation of the language of the Egyptians. The original, cut in the reign of Ptolemy V, 205 B. C., is in the British Museum.

EIGHT SLABS, cast from paper "squeezes," taken from sculptures at Thebes. One represents the chair of Queen Hat-a-su, between 1600 and 1700 B. C.

The casts in this room, with the exception of the great bas-relief over the door, were presented by Chas. G. Loring.

## FIRST GREEK ROOM.

### ANTIQUITIES FROM CYPRUS.

THE antiquities from Cyprus were sent to this country in 1871 by General L. Cesnola, U. S. Consul at Cyprus. They are but a small portion of the treasures taken from the Necropolis at Idalium (where he opened about 8,000 tombs), and from the site of the Great Temple of Venus at Golgos, which he discovered and identified. The pottery is extremely ancient, and for the most part Phœnician. The Phœnicians, who were the great merchants of antiquity, carried on an active trade in pottery, glass, small idols, votive offerings, beads, etc., such as are found along both shores of the Mediterranean from Syria to Spain. The system of ornament used upon this ancient earthenware, which we may call Phœnician, Pelasgic, or early Archaic, is made up of straight bands, zigzags, simple and concentric circles, disposed in spaces divided by horizontal, parallel, and vertical lines, painted or marked upon the clay while in a soft state by means of pointed sticks, knotted cords, or little wheels. Animal forms are rare, and conventional plant and flower forms unknown. The decorative system so closely resembles that of old Celtic pottery, and that of bronze implements found in the tombs of Northern and Central Europe, that certain archaeologists have supposed it to have been introduced into Greece, Italy, and the countries of Northern Europe by the Aryan tribes after their dispersion. Next in date to this early pottery, which is adorned with colored and incised lines, comes the later Archaic or Oriental, upon which horses, stags, and birds, especially water fowl and conventional plant forms are painted. The animal forms, instead of being, as in the older examples, straight-lined, angular, and thin, are rounded in outline and full in form. The hunter in his chariot upon the Oenochoe (No. 10) seems copied from an Assyrian bas-relief.

Taken as a whole the pottery from Cyprus represents a very ancient art system.

It comes next in date to that made by a people of the Stone Age, perhaps 2000 years B. C., which is found at Santorin, Thera, and Aspronisi (volcanic islands of the Archipelago). The Phoenicians colonized these and other Mediterranean Islands about 1500 B. C., after they had been twice covered with lava, under which prehistoric pottery has been found, with stone implements and remains of primitive dwellings.

The Cyprus pottery, the black Chiusi ware, and the Graeco-Italian painted vases at the Museum form together a collection which represents ancient Keramic art from about 1000 to 100 B. C.

Among the most interesting objects in the Cyprus collection are the fifty-one pieces of Greek glass, taken from the tombs at Idalium. The exquisite colors which they display are the result of oxidation, through contact with earth of a certain quality during many centuries. Oxidation, which gradually destroys glass and metal, has no power over terra cotta. The beautiful Greek fragments of statuettes in the Museum are as perfect as if made yesterday. Some of the heads of Cybele or Astarte are of the best period of Greek art, and the horse's head (No. 237) is like one of the Parthenon marbles in style and spirit.

The statuette, in calcareous stone, of a female figure holding a child in her arms, No. 127, repeated in the terra cotta, No. 133, is one of many such figures found at Cyprus, which, although it had no artistic school, was a centre of fabrication for small objects of devotion, such for instance as the rude little terra-cotta idol, No. 136, which probably represents Aphrodite. Similar figures are mentioned by Athenaeus as commonly sold as talismans to navigators in the seventh century B. C.; Lucian also says that terra-cotta figures of this kind were sold near the Temple of Venus, at Cnidus.

The little stone group, No. 152, is one of many repetitions of a traditional type, under which the Greeks represented the Telluric divinities as mothers and nurses. Such goddesses were called *κουροτρόφοι*, *i. e.* nursing goddesses. A certain number of

divinities were so regarded, as, for instance, Demeter, Gaea, and the great goddess of Cyprus, Venus Astarte, who seems to have been a combination of the conception of the Oriental Ashtaroth and the Greek Aphrodite. The group may perhaps represent Nana and her son Atys, the beautiful shepherd beloved of Cybele.

Among the most curious of the objects found in the tombs of Idalium, here exhibited, are rudely-shaped, and, in some instances, gaudily painted toys. It has been suggested that mothers placed these playthings in their children's graves.

The Cyprus cases contain pottery, figures, and other objects in terra cotta, as well as small stone heads, cylinders, amulets and ancient glass found at Cyprus by General Cesnola. The large stone heads from the same island are placed on brackets against the adjoining wall. These heads are of great interest, from the variety of type which they exhibit. The Asiatic, Egyptian, Greek, and Roman races, who successively ruled over Cyprus, are each represented in these mutilated monuments.

M. F. A.

**CASE ON THE LEFT.**—The gray earthen vases, bowls, patteræ, decorated with parallel lines, concentric circles, and checkered designs, with occasionally a figure resembling the vanes of a windmill, were found in Phœnician tombs at Idalium, a city conquered by Greek colonists.

The vessels of whitish clay, decorated with cross-lines and checks of rough execution, were found with cylinders and other work of Assyrian origin.

The red glazed ware, not checked, was from the Island of Samos, probably of Græco-Roman date; while the red ware of fine clay, ornamented with concentric circles, came also from Idalium, but from a group of tombs apart from the others, belonging, probably, to a different race or epoch.

The vases, with similar Phœnician designs *scratched* upon them, were found at Alambra, and with them bronze spear heads, knives, and toy figures of warriors.

The principal objects of interest are,

A VERY ANCIENT PITCHER, vertical and horizontal bands in brown, formed of lines, dots, and diamond-shaped patterns.

PHœNICIAN BIRD-SHAPED PITCHER, ornamented with diagonal and vertical lines in red. Another, with neck and tail ; ornamented with indented zigzag lines ; holes in rings for suspending. Another, of yellow clay ; the rings disposed vertically in four rows ; painted, with diagonal lines forming rows of triangles in brownish red. ARYBALLOS, or Pilgrim Bottle ; red clay, with double handle.

ON THE FLOOR, large AMPHORA, used to hold wine or oil. The pointed base was stuck in the ground. Two Earthen Jars, with Phœnician inscriptions ; one is "MAHAZ," the name of a large vessel used for wine.

CASE ON THE RIGHT, above, a Greek AMPHORA, with twisted handles and cannelated body; remarkably beautiful shape.

In the case, an OENOCHOE. Round the neck are straight and zigzag lines in black and red. Animal-headed handle. The painting, which represents a hunter about to shoot an arrow from a bow, and a charioteer in a chariot drawn by a black horse, resembles a lion hunt as figured in Assyrian bas-reliefs. ANOTHER of yellow clay, with compressed trefoil lip. A fantastic animal resembling a horse is painted on one side. ANOTHER, decorated with an animal of the deer species. ANOTHER, decorated with a bird in black and red. A SMALL PITCHER ; zone of birds; at base, leaves ; ornament at the top composed of lines crossing each other.

Fifty-one Pieces of GLASS, including, — Lachrymatories, Cups, Bottles, Pateræ, and a Flat Round Plate.

A number of TOYS, figures of animals, etc. Two Figures supposed to be standing in a chariot; terra cotta, and very rudely modelled. PHœNICIAN TOYS, a Horse with a jar on his back; a little animal of terra cotta; a figure on horseback; a terra-cotta chariot. VOTIVE OFFERING, bull's head, (Apis.) VASE, shaped like a bull. VASE, shaped like a duck, terra cotta. WEIGHTS, CYLINDERS (used by the Assyrians as signet rings), a button, etc. etc. Egyptian and Phœnician

AMULETS. A Phoenician IDOL, representing the great Goddess of Cyprus, VENUS Astarte. MASK of a Bearded man, colored red and black.

IN THE CENTRE are grouped various heads, fragments of statues, etc. STONE STATUE, Head Detached, representing a priest of Venus holding the sacred dove in his hand. Roman type.

CENTRAL CASE. The small terra-cotta Female Heads are often of great beauty. STATUETTE OF CYBELE, or Gaea (Mother Earth); crowned heads of APHRODITE, or the Syrian Goddess. STATUETTE of a Seated Woman holding a Child upon her Knees. Cybele "*κυροτρόφος*." HEAD draped like the Pudicitia of the Vatican. HORSE'S HEAD, very fine, style of the Parthenon marbles. SMALL STONE HEADS, the long nose is a characteristic of the modern inhabitants of Cyprus. LAMPS of terra cotta.

LOWER CASE. One hundred and nine objects in BRONZE, consisting of spear heads, a mirror, hatchets, armillas, mortuary rings, hinges, and fibulæ; two objects in silver; serpentine pateræ and cones (emblems of Venus).

#### ETRUSCAN VASES.

This collection of Etruscan pottery consists chiefly of the black ware with ornaments in relief found at Chiusi (the ancient Clusium), and of small sarcophagi ("ash chests"). These objects from the Museum at Chiusi, which was purchased by Sig. Servardio, of Florence, were bought at public sale in 1875, and presented to the Museum by Mr. J. J. Dixwell. The Chiusi pottery, which is "of coarse, black, unbaked ware, of uncouth forms, grotesque decorations, rude workmanship, and no artistic beauty, is of great interest as illustrative of Etruscan art in its earliest and purest stages, ere it had been subjected to Hellenic influence. Such ware is peculiar to Chiusi, Sarteano, and the neighboring Etruscan cities. This ware is not to be seen in the Gregorian Museum at Rome, in the Louvre, in the

British Museum, nor in any Italian Museums save those of Chiusi and Florence." (See Dennis's cities and cemeteries of Etruria, Vol. II, ch. 50, pp. 347 *et seq.*)

The collection presented by Mr. Dixwell consists of forty-seven objects. Among the most remarkable are the Focolari or Recipienti. These oblong, round, or square trays were either used as braziers, or to contain toilet articles, or for fumigation, or to hold flour at the funeral feast. Dennis (*op. cit.*) thinks that if sepulchral in their application and meaning, they may still be regarded as "imitations of domestic furniture once actually in use and rather pertaining to the *triclinium* than to the toilet."

The small sarcophagi, cinerary urns, or "ash chests," in the Dixwell collection, are of great interest. They retain traces of color, and are decorated with recumbent figures, probably representing the deceased whose ashes they contained, and with bas-reliefs. The bas-reliefs being multiplied from moulds show little variety of subject. They represent Jason, Cadmus slaying the warriors sprung from the dragon's teeth, or the combat of Polynices and Eteocles.

Besides the black ware peculiar to Chiusi, painted Etrusco-Greek vases, etc., of every description, are found in its cemeteries. Some specimens may be seen in this collection.

#### GREEK VASES.

The collection of Græco-Italian fictile painted vases, Nos. 1 to 41, found by Alessandro Castellani, in the tombs of Etruria and Campania, was presented to the Museum by Mr. Thomas G. Appleton.

Nos. 42 to 54, inclusive, were presented by Mr. Edward Austin. Others in the same case were loaned by Messrs. G. W. Wales and C. C. Perkins.

In the first half of the last century it was customary to regard the painted vases found in Italy as Etruscan; but as numbers of vases with Greek inscriptions were found in the tombs of Magna Græcia and Sicily, Winckelmann declared them to be Greek. After this, the names of Italo-Græco and

Siculo-Græco were applied to them according to the locality where they were found, while those with black figures on a red ground were particularized as Sicilian, and those of the best period, with red figures upon a black ground, were named Nolan, from Nola in Campania, where they were first discovered. The truth of Winckelmann's theory was almost absolutely proved in the year 1823, by the discovery of the Necropolis at Vulci, which yielded no less than six thousand vases painted with subjects relating to the myths and poetry of Greece, Greek in style, and bearing inscriptions in the Greek language. As there is not even a tradition of the existence of a Greek population in the region about Vulci, and as such an immense number of vases could hardly have been transported from Greece to Italy, the learned were forced to conclude that they must have been made in local workshops under Greek direction. This conclusion applies not only to the Vulci vases, but also to all those found in the cemeteries of other Italian cities, not of Hellenic origin. Certain kinds of vases like those in the Dixwell collection of black ware ornamented with figures in relief, which are found only in Italy and especially at Chiusi; those adorned with representations of Etruscan deities, and with emblems and symbols connected with the worship of Bacchus as god of the infernal regions; and those inferior copies of Greek originals evidently painted by native scholars of foreign masters, which are found at Chiusi, may be regarded as Etruscan works, but with these exceptions the painted vases found in Etruria are undoubtedly of Greek origin.

Some archæologists believe that painted vases were placed in Greek and Etruscan tombs as "tesserae," or marks that the deceased had been initiated into the Eleusinian or Dionysiac mysteries. Dionysus, or Bacchus, was the husband of the Eleusinian Demeter, and he was often depicted as the god of death by the ancients. What are called Panathenaic vases (*i. e.* vases filled with oil from the sacred olive tree planted by Minerva on the Acropolis, which were given as prizes to the victors at the Panathenaic festivals) were preserved as marks of honor and buried with the recipient. The Lekythoi

found in Attic graves were often expressly made for burial purposes, as we know from a passage in Aristophanes, who further refers to the custom of laying them upon the corpse. Vases which had been especially valued by a deceased person were piously buried with him, while those which are too small, or, being unglazed, are unfit for household uses, must have been made expressly for burial. Painted vases were seldom used to contain ashes; they were either placed about the corpse, or laid upon it, or hung upon the walls of the grave chamber. The subjects represented upon them are divisible into two great categories, namely, mythic, embracing the whole cycle of Greek mythology, and individual, as connected with private life.

The most renowned Greek potters were those of the Ceramicus, a quarter of Athens in which they resided. They made vases of wonderful lightness, and adorned them with paintings of great beauty. They used very fine, carefully prepared clay, of a bright-red color, which they heightened by a varnish mixed with red. Before using this varnish, they painted figures upon the clay surface with a shining pigment of a brownish hue, or of deep black, playing into olive tones; or else filled up the spaces between the outlines of the figures with black, leaving them the natural color of the clay. They first marked out the general outlines and the contours of limbs, muscles, and draperies with a sharp instrument, and then went over them with a brush filled with dark color, laid on with wonderful accuracy. Additional colors, such as white, green, violet, and dark red, were added by the vase painters of the latest period, after the vessel had been twice burnt in the furnace.

For purposes of classification, the following division into six classes may be taken as resting on good authority, though these names are not in all cases applied with absolute certainty :—

1. Amphora, Pithos, Pelice, and Stamnos, large vases for holding wine, oil, figs, and honey.
2. Hydria and Kalpis, vases for carrying water.

3. **Œnochoe**, Olpe, and Prochoos, pitchers for pouring out wine and water.

4. Krater, Kelebe, and Oxybaphon, vases for mixing wine with water.

5. Kautharos, Kyathos, Karkhesion, Holkion, Skyphos, Kylix, Lepaste, Phiale, Keras, and Rhyton, drinking vessels.

6. Lekythos, Alabastron, Askos, Bombylios, Aryballos, and Kotyiskos, receptacles for ointments and perfumes.

Many of these are represented in the Appleton and Cyprus collections, as, for instance,—

Amphora, Nos. 5, 12, 13, etc.

Kalpis, Nos. 7 and 17.

Œnochoe, Nos. 24 and 25.

Prochoos, No. 48.

Oxybaphon, No. 23.

Krater, No. 37.  M. F. A.

Kylix, No. 20.

Kantharos, Nos. 22 and 33.

Skyphos, No. 21.

Aryballos, Nos. 4 and 32.

Patera, Nos. 35 and 36.

The APPLETON COLLECTION contains examples of vases of four periods subsequent to the prehistoric period, which is represented by three small vases from the Lacustrian habitations of Southern Italy (Nos. 1, 2, and 3). These vases are similar to those found in nearly all the Swiss lakes. Lacustrian pottery, which is also found in Northern Italy, is either plain, like these examples, or adorned with horizontal or vertical lines incised around the body of the vessel, or with short or oblique lines disposed geometrically. It is hand-made, *i. e.* made without the aid of the wheel, which was, however, used at a very early period both in Egypt and in Greece, whence the cup or dish fashioned upon it was called the daughter of the wheel.

The painted vases of the first epoch, which begins with the first Olympiad, 776 B. C., and closes about 500 B. C., are called Asiatic or Corinthian. For the most part they were made at

Corinth, a city renowned for its potters and actively engaged in commerce with the East and with Italy. The dull, yellowish clay of which they are formed is painted with rows of animals, such as lions, panthers, bulls, and birds disposed in zones around the body of the vase, and with floral ornaments of an Asiatic character. Nos. 4-11.

The vases of the second epoch, 500 to 300 B. C., are adorned with figures painted in a black pigment upon a red background. The figures are disposed in single file and treated in an Asiatic style. They are long and attenuated, exaggerated in action, with broad hips, long noses, and staring eyes. Their range of subjects is, for the most part, mythical. The oldest belong to the sixth century B. C., but such vases were made up to a late period. In some cases this style and the succeeding were mixed; but when this is the case, the black figures are treated archaically according to traditional stylistic laws. Nos. 12-15.

The vases of the third epoch, which extends from about 300 to 200 B. C., are the finest. The subjects illustrate Greek mythology and Epic poetry. The figures, which are red upon a black ground, are of the purest outline, and show the highest technical skill. See Appleton Collection, Nos. 16-26.

The vases of the fourth epoch (200-100 B. C.) are of Apulian manufacture. They belong to the latest period of the art, which began to decline after the introduction of gold and silver vases from the East through the conquests of Alexander. They are, in many cases, of enormous size, very elaborately decorated, overcharged with ornament and color, and extravagant in shape. Those of the latest period are more and more strongly marked by these signs of decadence. Nos. 27-41.

#### **PREHISTORIC.**

- 1, 2, 3.     THREE SMALL VASES of black and brownish earth from the prehistoric Lacustrian habitations of Southern Italy.

**ASIATIC. FIRST EPOCH, 700-500 B. C.**

4. ARYBALLOS, of yellow, unglazed earth, decorated with a fantastic, tiger-headed bird, surrounded by open and closed lotus flowers.

These ornaments have a great affinity of style with those upon Assyrian monuments. They are painted in a single color of a burnt reddish-yellow. Found at Cumæ.
5. AMPHORA. Painted with two zones of animals, birds, and open lotus flowers. Found at Capua.
6. OENOCHOE. Zone of animals and open flowers painted in black and reddish-brown. Found at Capua.
7. KALPIS.

Four female figures and two sphinxes are painted about the neck. The body of the vase is decorated with two kinds of fantastic animals of an Egyptian character, and with many open flowers. Found at Noia.
8. COLANDER, with two handles. Yellow clay, decorated with black and red lines. Found at Canosa, in Apulia.
9. URN, with two closed and two open handles of fantastic animal forms, decorated with red and brown geometrically disposed lines. Found at Canosa.
10. SMALL VESSEL, of bird-like shape, with geometrical decorations in red and brown. Found at Canosa.
11. URN, double, with a single handle. Ionic ornaments in brown and red. Found at Canosa.

**SECOND EPOCH, 500-300 B. C.**

12. AMPHORA, of yellowish clay, with figures of hunters and liturgical scenes engraved with the point (sgraffiti) and painted in a yellow, darker than the background. Palmettos and lotus flowers about the neck. Found at Cervetri.
13. BACCHIC AMPHORA. Black and white figures on a red ground. Bacchus and Ariadne between two groups of Mænads. At the back, two persons in a quadriga, followed by an old man bearing a sceptre. A Hoplite stands near the horses. Found at Capua.

14. **BACCHIC AMPHORA.** Black and white figures on a red ground. Hercules fighting with the Nemean Lion, or the Lion of Cythæron, in which latter case the figure carrying a sceptre may be Amphitryon or Thespius. At the back are Mænads and a priest of Bacchus. Bought from the Cav. Visconti, in 1836.
15. **BACCHIC AMPHORA.** Black figures adorned with white and violet tones. Mænad mounted upon the Dionysiæc Bull. Mercury walks before. The subject at the back is almost identical. Found at Capua.

#### **GRÆCO-ITALIAN. THIRD EPOCH, 300-200 B. C.**

16. **AMPHORA FROM NOLA.** Red figures on a black background.

Two persons, a man and a woman, conversing together. The man leans on a stick. Between them the words ΚΑΛΟΣ ΔΙΩΝ “beautiful, or noble Dion” are inscribed in white. At the back of the vase is a young man holding two eggs in his right hand. Found at Nola.

17. **KALPIS.** Very fine.

A seated woman (Penelope?) is occupied in taking jewels from a casket which he holds upon her knees. One of her attendants, standing near her, presents a shut casket. A second, robed in an ample peplum, stands behind her mistress. Found at Nola.

18. **AMPHORA PELICE.** Alcibiades walking in the streets of Athens, followed by a slave leading a large dog, whose tail is to be cut off by his master's order. The youth, who appears to be making fun of the deformed slave, probably symbolizes the Athenian people. Plutarch; Alcibiades. X. Found at Capua.

19. **AMPHORA.** A Satyr carrying Silenus on his shoulders, followed by another Satyr, who seizes him by the tail. Inscription, ΧΑΡΜΙΔΕΣ ΚΑΛΟΣ. At the back a Satyr. Found at Nola.

20. **KYLIX.** Inside, a young man lying on a couch holding a Kantharos (the Cup of Bacchus) in his left hand, and raising a Kylix in his right. He is playing a game of Sicilian origin called *κότταζος*. In this game the player tried to throw wine from one cup to another without spilling a drop, while at the same time he pronounced the name of his mistress. Outside, a person holding a lyre, who stands between two draped figures. Same subject at the back. Letters illegible. Found at Capua.
21. **SKYPHOS.** Two Satyrs and four Mænads painted in silhouette; black, on a red ground. Imitation of the style of the second epoch. Found at Capua.
22. **KANTHAROS.** Decorated with a wreath of laurel. Found at Capua.
23. **OXYBAPHON.** A woman playing on a pipe, between two men crowned, one of whom seems about to dance. At the back are three young men (Ephēbi) draped. The exterior border is decorated with a wreath of laurels. Found at Ruvo, in Apulia.
24. **ŒNOCHOE.** Black, with a very lustrous glaze. Found at Nola.
25. **SMALL ŒNOCHOE.** Cannellated, and covered with a very beautiful black glaze. Found at Cumæ.
26. **AMPHORA PELICE.** Imitation of the style of the second epoch. Subject: Pasiphae between two bulls. Same subject repeated at back.

#### FOURTH EPOCH. VASES FROM APULIA, 200-100 B C.

27. **ŒNOCHOE.** High handle, decorated with a mask-woman's head and flowers. Red on black, with white and yellow tones.
28. **ARYBALLOS.** Black and cannellated. Head of a woman. Black and white ornaments. Found at Gnatia.

29. AMPHORA PELICE. Black. A winged and seated genius is painted upon it. Found at Gnatia.
30. KANTHAROS, with knotted handles. Black and canel-lated. Decorated with garland and yellow pal-metos. Found at Gnatia.
31. CENOCHOE. Very elegant. Black, with white and yel-low ornaments. Found at Gnatia.

**DECADENCE.****32 ARYBALLOS.**

Venus seated, caressing a dove. Behind her stands a young man holding a strigil. A young woman offers him a basket of fruit. Two Mænads and a Satyr are painted on the border. Found at Ruvo.

33. KANTHAROS. Bacchus seated, holding the Thrysus. At the back a running Mænad. Found at Canosa.
34. SMALL URN, with a cover. A winged hermaphrodite genius seated, holding a casket in his right hand. At the back is a running Mænad. Found at Ruvo.
35. VERY LARGE PATERA with handles. At the bottom of the cup is a seated woman holding a cup in her left hand. With her right she takes a casket from the ground, and turns to a companion who offers her an Alabastron. A shepherd with a torch and a crook. The subject is connected with the Eleusinian mysteries. Found at Ruvo.
36. LARGE PATERA, with handle. At bottom of cup in a medallion is a woman's head, seen in pro-file. Her ear-rings, diadem, and necklace are painted yellowish-white. A wreath of dry leaves and berries surmounts the medallion. Orna-ments on handles are white or greenish black. At back, a seated hermaphrodite genius holding a casket, also a draped woman with a mirror and a wreath. Subjects divided by large palm leaves Red on black.

37. **LARGE KRATER.** Dionysus in royal robes, carrying the Thrysus and the Kantharos. He is preceded by a Satyr holding a lighted torch, and followed by a drunken Mænad and a Satyr. At the back three Ephebi wrapped in their peplums. Found at Ruvo.
38. **LARGE AMPHORA**, with columnar handles. A woman offers a basket of fruit and wine to two young heroes (the Dioscuri?). The top of the vase is decorated with garlands of ivy, and at the back are three Ephebi wrapped in their mantles. Found at Canosa.
39. **AMPHORA.** Subject, Bacchus and a Mænad. At the back are two Ephebi. The top is decorated with garlands of ivy.
40. **LAMP-SHAPED JAR** of black ware. On the top is a genius riding on a panther. Subject in relief.
41. **SMALL KANTHAROS.** Imitation of the style of the second epoch.  
*M.F.A.*

Other vases not classified are —

42. **SKYPHOS.** Black with red lines around the upper part and ornaments at base.
43. **KANTHAROS.** Apulian. (Like No. 33 found at Canosa.) On one side Mercury is represented, on the other Minerva.
44. **SKYPHOS.** (Like No. 21 found at Capua.)
45. **SMALL APULIAN AMPHORA.** Black ornaments on a red ground.
46. **ANOTHER.** Black figures and ornaments on a yellowish ground. A quadriga.
47. **ANOTHER similar.**
48. **PROCHOOS.** Apulian. White, yellow, and red ornaments on a black ground.
49. **CUP**, with two handles. Decorated with laurel leaves. Red on black.
50. **A ROUND JAR**, of brown terra cotta, with a cover. The ornaments upon it are rudely scratched with a sharp point. (Sgraffito.)

51. KYLIX. Black.
52. AMPHORA. Asiatic. The Assyrian ornaments are painted in pale red on yellow clay.
53. APULIAN AMPHORA, OR VASE A TROMBA. The flowers and ornaments are painted in red, picked out with white on a black ground. A seated woman holds a mirror in her left hand into which a flying genius looks.
- Nos. 60-67 are loaned by Mr. G. W. Wales.*
60. SMALL FICTILE VASE of black ware, with a gilded subject in relief, representing a man holding a double-headed axe, and a tiger.
61. SMALL AMPHORA. Second period. Figures black on a red ground. Bacchic subject.
62. SMALL LEKYTHOS. Subject, Bacchus in a chariot, preceded by a Faun. Figures black on a red ground. Second style.

POTTERY OF THE MOUND-BUILDERS. An interesting collection of ancient American pottery, presented by Mrs. Gardner Brewer and Miss Brewer.

Nos. 1 to 18. Water Jars, flask-shaped, some of very graceful forms.

Nos. 25 to 47. Pots and Dishes, with and without handles. No. 31 is curious, the handle being in shape of a bird's head turned in towards the dish.

Nos. 35 and 36 give the outline of a fish; the head and tail are the handles; on one side the long dorsal fin, on the other four pectoral and ventral fins.

Nos. 48 to 56. Water Jars with human or animal heads.

They are of dark clay, often mixed with finely powdered shells. These were excavated at Diehlstaat, Missouri, by Dr. Geo. J. Engelmann, from a series of mounds on a peninsula which could have been cut off for defence, fortified by wall and ditch.

The date of the mound-builders has not been determined, and no resemblance can be traced in their skulls to those of modern tribes of Indians. Prof. F. W. Putnam, in the eighth annual report of the Peabody Museum, Cambridge, p. 45, quotes Prof. G. C. Swallow in reference to some similar mounds as follows:—

“The six feet of stratified sands and clays formed around the mounds since they were deserted, the mastodon’s tooth found in these strata, and other facts indicate great age. These six feet of thin strata were formed after the mounds and before the three feet of soil resting alike on the mounds and on these strata.”

Also nine specimens of pottery, precisely similar, dug up near Cairo, Illinois. Lent by Geo. W. Wales.

### **ON THE WALLS.**

**THIRTY CASTS FROM THE WALLS OF THE ALHAMBRA.**

Presented by Col. Marin, Commissioner from Spain to the Centennial Exhibition at Philadelphia.

**GOBELIN TAPESTRY** of the 15th century, representing France crowned by Victory and attended by Minerva. The female figure to the left represents a conquered kingdom. The two to the right are prisoners. Signed I. Van Schorrel. Presented by Miss Deacon.

The famous manufactory of the Gobelins was founded at Paris towards the end of the 15th century by Jean Gobelin, a native of Rheims. In 1662 Louis XIV and his minister, Colbert, united in this establishment all the trades which were under the royal protection, such as potters, weavers, etc. Charles le Brun, the painter (born 1619, died 1690), was appointed its director in 1663. He furnished designs for many fine pieces of tapestry, which were surrounded by rich framework of fruits and flowers designed by Baptiste Monnoyer.

THE GOLDEN AGE. (Oil Painting.) Luca Giordano.  
*Athenæum.*

TWO TROPHIES OF ARMS AND ARMOR. (Electrotype reproductions.) Presented by a former citizen of Boston.

### LANDING OF STAIRCASE.

CAST OF THE ARIADNE. (From the Vatican.) Middle of 4th century B. C.? Sumner bequest.

TWO HALL SEATS. Florentine and Venetian. Lent by *Lowell D. Allen.*

### UPPER HALL.

HALL SEAT AND MARRIAGE CHEST. *Charles H. Joy.*

PULPIT-DOOR, INLAID WITH IVORY AND EBONY, from a mosque at Cairo. It bears at the base the inscription, "Honor to our master, the Sultan, El-Malek E'Zaher Barqouq, and may God make glorious his reign!"

Sultan Barqouq, founder of the dynasty of Circassian Memlooks, reigned from 1382 to 1398. He twice marched into Syria and repulsed the Tartars under Tamerlane. On the frame above the door (the moucharabieh) is the inscription in large Cufic characters, "Of a surety God commands to reign by power and goodness." This admirable specimen of Saracenic art was purchased in the Egyptian Department of the Exhibition at Philadelphia and presented to the Museum by Martin Brimmer.

THE ORIENTAL ARMS on the right, also, were purchased at Philadelphia and presented by a former citizen of Boston. The head-piece, shield, and arm-pieces are of the richest Persian work, carved in high relief and engraved.

Those on the left, the bequest of T. B. Lawrence, are damaskeen work (steel inlaid with gold) of great beauty. On the right, an enamelled poignard is especially noticeable.

ALABASTER FOUNTAIN for ablution, from Cairo. A Cufic inscription is on the base. *Athenæum.*

PERSIAN VASE of perforated brass work.

LARGE PERSIAN PLAQUE of brass, engraved and inlaid with silver.

PERSIAN DRUM of brass.

COPPER WATER JAR, from Tunis; modern.

FLORENTINE CABINET OF CARVED WOOD. From the Villa Salviati. It contains some fine specimens of Greek vases. *Lent by Lowell D. Allen.*

CAST OF THE SECOND BRONZE GATE at the Baptistry at Florence. Lorenzo Ghiberti. 15th century.

“Louise Eléonore de Warens était une demoiselle de la Tour de Pil, noble et ancienne famille de Vevay. Elle en avait alors (1728) vingt huit ans. Elle avait un air caressant et tendre, un regard très doux, un sourire anglique, des cheveux cendres d'une beauté peu commune, et auxquels elle donnait un tour négligé qui la rendit très piquante. Il était impossible de voir une plus belle tête, un plus beau sein, de plus belles mains, et de plus beaux bras.”

*Extract from Ruskin's "Modern Painters."*

"I think the noblest sea that TURNER has ever painted, and if so, the noblest certainly ever painted by man, is that of the Slave Ship, the chief Academy picture of the Exhibition of 1840. It is a sunset on the Atlantic, after prolonged storm; but the storm is partially lulled, and the torn and streaming rain-clouds are moving in scarlet lines to lose themselves in the hollow of the night. The whole surface of sea included in the picture is divided into two ridges of enormous swell, not high nor local, but a low, broad heaving of the whole ocean, like the lifting of its bosom by deep-drawn breath after the torture of the storm. Between these two ridges the fire of the sunset falls along the trough of the sea, dyeing it with an awful but glorious light,—the intense and lurid splendor which burns like gold and bathes like blood. Along this fiery path and valley, the tossing waves by which the swell of the sea is restlessly divided lift themselves in dark, indefinite, fantastic forms, each casting a faint and ghastly shadow behind it along the illuminated foam. They do not rise everywhere, but three or four together in wild groups, fitfully and furiously, as the under-strength of the swell compels or permits them, leaving between them treacherous spaces of level and whirling water, now lighted with green and lamp-like fire, now flashing back the gold of the declining sun, now fearfully dyed from above with the undistinguishable images of the

burning clouds, which fall upon them in flakes of crimson and scarlet, and give to the reckless waves the added motion of their own fiery flying. Purple and blue, the lurid shadows of the hollow breakers are cast upon the mist of the night, which gathers cold and low, advancing like the shadow of death upon the guilty ship as it labors amidst the lightning of the sea, its thin masts written upon the sky in lines of blood, girded with condemnation in that fearful hue which signs the sky with horror and mixes its flaming flood with the sunlight, and, cast far along the desolate heave of the sepulchral waves, incarnadines the multitudinous sea.

"She is a Slaver, throwing her slaves overboard. The near sea is encumbered with corpses.

"I believe if I were reduced to rest Turner's immortality upon any single work, I should choose this. Its daring conception, ideal in the highest sense of the word, is based on the purest truth, and wrought out with the concentrated knowledge of a life; its color is absolutely perfect, not one false or morbid hue in any part or line, and so modulated that every square inch of canvas is a perfect composition; its drawing as accurate as fearless; the ship buoyant, bending, and full of motion; its tones as true as they are wonderful; and the whole picture dedicated to the most sublime of subjects and impressions (completing thus the perfect system of all truth, which we have shown to be formed by Turner's works),—the power, majesty, and deathfulness of the open, deep, illimitable sea."

101. WASHINGTON. By Gilbert Stuart.  
*Athenæum.*

"A letter of Stuart's which appeared in the New York *Evening Post*, in 1863, attested by three gentlemen of Boston, with one from Washington, making the appointment for a sitting, proves the error long current in regard both to the dates and the number of this artist's original portraits of Washington. He there distinctly states that he never executed but three from life, the first of which was so unsatisfactory that he destroyed it; the second was the picture for Lord Lansdowne; and the third, the one now belonging to the Boston Athenæum. The finishing touches were put to the one in September, 1795; to the other, at Philadelphia, in the spring of 1796. This last, it appears by a letter of Mr. Custis, which we have examined, was undertaken against the desire of Washington, and at the earnest solicitation of his wife, who wished a portrait from life of her illustrious husband, to be placed among the other family pictures at Mount Vernon. For this express purpose, and to gratify her, the artist commenced the work, and Washington agreed to sit once more. It was left intentionally unfinished, and when subsequently claimed by Mr. Custis, who offered a premium upon the original price, Stuart excused himself, much to the former's dissatisfaction, on the plea that it was a requisite legacy to his children." — *Putnam's Magazine*, 1855.

The second is now in the possession of Mr. Russell Sturgis, London.

### TAPESTRIES.

THE three magnificent specimens of tapestry loaned to the Museum by Mr. George O. Hovey, and once the property of King Louis Philippe, were saved from the fire which destroyed the château at Neuilly in 1848. They were purchased in Paris by Mr. Hovey, who brought them to Boston, where they were again saved from the flames in November, 1872. The dimensions of the two largest are 20 x 12, the third is 15 x 12. They represent Summer, Autumn, and Winter. They are supposed to be at least two hundred years old, though it is difficult to be precise about the date of arras hangings. They are what are technically called tapestries *de haute lisse*, *i. e.*, wrought on the upright or vertical frame which was substituted for the Saracenic low or horizontal frame (called *basse lisse*) by the Flemish and French artisans in the fourteenth century.

The question is often asked as to how far such textile fabrics are the work of the hand. We quote from Dr. Rock's descriptive catalogue: "Tapestry is neither real weaving nor true embroidery, but unites in its working these two principles into one. It is not embroidery, though so very like it, for tapestry is not worked upon what is really a web, having both warp and woof, but upon a series of closely set, fine strings. Though wrought in a loom and upon a warp stretched along a frame, it has no woof thrown across those threads with a shuttle or any like appliance, but its web is done with many short threads, all variously colored, and put in by a kind of needle. With the upright as with the flat frame, the workman went the same road to his labors; but in either of these ways he had to grope in the dark a great deal on his path. In both he was obliged to put in the threads on the back or wrong side of the piece, following the sketch as best he could behind the strings or warp. As the face was

downward in the flat frame he had no means of looking at it to correct a fault. In the upright frame he might go in front, and with his own doings in open view on the one hand and the original design full before him on the other, he could mend as he went on, step by step, the smallest mistake, were it but a single thread."

THREE SPECIMENS OF FLEMISH TAPESTRY, formerly in the château at Neuilly, representing Summer, Autumn, and Winter. *Lent by Geo. O. Hovey.*

SMALL TAPESTRY, woven at Arras in the early part of the 15th century, from a cartoon by an artist of the school of Raphael. It bears the arms of Cardinal Caraffa, and was presented by him to a church in Naples. Purchased from Sig. Alessandro Castellani.

The Flemish Tapestry on the south wall has been temporarily removed to hang several fine specimens of PERSIAN FABRICS, Wall Hangings, Prayer Rugs, etc., of the 16th and 17th centuries. These were exhibited by Sig. Castellani at Philadelphia; one half were purchased and presented to this Museum by Martin Brimmer, Esq., the remainder were bought by the Pennsylvania Museum.

THE EIGHT PANELS OF OAK GILDED on the wall between the windows were taken from the Hôtel Montmorency, and subsequently built into the Deacon House. *Lent by Mr. Harleston Parker.*

### POTTERY AND PORCELAIN.

The interest in fictile wares has always existed, and it always must exist. From time to time it reaches a sort of high tide when all the world consents to look and to know something about it. Within the last ten years this interest has been great, and it is likely to continue.

The fact that pottery and porcelain belong to the daily business of life, and that they are indispensable to the great event of that life,—a man's dinner,—make them indeed objects in which all may take a living interest.

Among the very first works which the hand of man has formed are pots and dishes; and one of the first machines was the potter's wheel, which is in use to-day as it was in the days of the pyramid builders. One other reason why pottery is among the most interesting of the works of man is, that it most easily receives the impression which the taste, the skill, the art of the workman can give it.

We thus get in the pot not only the useful thing, but whatever of form, of decoration, of beauty, of art, the soul of the workman may strive to express. The study of pottery, therefore, is, in some degree, the study of a part of man's soul. From the very outset, even as far back as the "Stone age," there were attempts at beauty of form and fitness of decoration. We find this expression of the artistic feeling in its pottery among all nations, from the Egyptians, through the Assyrians, the Greeks, the Moors, the Italians, the Germans; everywhere, and in all nations.

The Incas of Peru and the Toltecs of Mexico had their peculiarities of form and of decoration, though it must be observed that these earliest forms have a close likeness to the earliest attempts of all other peoples.

But when we get to a higher style of expression, we find the peculiarities most marked; and in such nations as the Chinese and the Japanese they reach art of the highest quality, and most especially in COLOR and decoration. There seems to have been, and to be, in the Asiatic races, this genius for color quite marvellous and quite superior to anything the white races have done. This is seen not only in its porcelains, but as well in its carpets, its shawls, its stuffs.

The loan collections in the Museum show excellent and varied examples of this.

It may be observed that the Chinese and Japanese artists did not sit down to *copy* a flower, or a tree, or person. There

is a certain something which we choose to call the *ideal* which they caught. May it not be called the *soul* of the object rather than its body? And yet their work is not slovenly and careless, but is marked above all others by thoroughness and care.

The Greek artist appears again to have found his highest expression in FORM; so that in the Greek vase we look for and find what we feel to be grace, beauty, and use in perfect combination. The collection in the Museum will present good illustrations of this; while the paintings upon them do not always reach a high standard of art. Nor must we claim that every Greek amphora or kylix is perfection even in form. It is not so. Nor is every picture of Raphael perfect; nor every play of Shakespeare divine. Only, among the multitude of Greek vases, etc., which the tombs have preserved for us, are to be found examples of form which have not been and cannot be surpassed.

The visitor should notice the collection of Etruscan vases in the Museum; and should observe that they are quite different from the Greek, which for so long a time have been miscalled Etruscan. This collection of Etruscan fictile work is most rare and valuable, as illustrating the art of pottery.

We find, again, among the Arabs and Moors, and especially those of Spain, another expression of art in pottery, which is beautiful and peculiar to them. Their decorations did not include the human figure, but were geometrical and whimsical, sometimes including plant forms and animals in great variety,—what have come to be termed Arabesques. Some excellent examples are in the collection. But the coloring of those made in Spain bore a shimmer, called a *lustre*, which is peculiar, and seems to have been original. It was produced by the use of mineral salts or oxides.

This Moorish ware was the parent of the Italian *Maiolica*, of which some good and very valuable examples have been presented to the Museum. When these Maiolica wares were first made in Italy (about A. D. 1500), they all had this lustre, and it was greatly enhanced in beauty above the work of the Moors by Mastro Giorgio at Gubbio, fine examples

of whose work sell for enormous prices; but most of what is now called Maiolica does not bear the lustre, as the examples in the Museum make apparent. Both the Moorish and the Maiolica wares will repay attention, as they were the precursors of the porcelains and Faïences which afterward reached such great perfection in Europe.

Of European porcelains, the Dresden or Meissen and that of Sevres reached the greatest perfectness, and have commanded most attention and most money. Examples of these can be studied at the Museum. But following the discovery of the true Kaolinic or China clay in Europe, Böttcher, about 1710, succeeded in making true porcelain in Saxony. During that century, porcelain manufactories were started in nearly all the countries of Europe, in which porcelain of greater or less perfectness was made. The study and collection of these has now become important, enlisting much mind and much money. These collections are of great value, and it is not uncommon that as much as \$10,000 is paid for a single vase or dish. Growing out of all this art and this interest comes the porcelain and pottery used in daily life. In these, within this half-century, have been great improvements, and to this every household bears its testimony. For thus helping to beautify and perfect our household life we may willingly thank the lovers and collectors of pottery and porcelain, and we may and do look to collections in Museums of Art, also, to help on the good work.

C. W. E.

The visitor will find antique Egyptian, Cyprian, Etruscan, and Græco Italian pottery on the first floor in the "Egyptian" and "First Greek" rooms; and on the same floor, in the Hall, a collection of the Pottery of the American Mound-builders. In the "Loan" room are, in Case A, specimens of Maiolica and Robbia ware; in Cases B and C, porcelains; and in Case D, modern pottery of various nations.

**CASE A.****MAIOLICA AND ROBBIA WARE.**

In what is called Hispano-Moorish ware, we find the original source of this beautiful art-manufacture. Moorish

potters were established in the island of Majorca (in the Tuscan dialect *Maiolica*) at a very early period, and fabricated earthenware plates distinguished for the beauty of their metallic oxide glaze. They adorned them with Arabic patterns and fantastic animals. The oldest establishment of this sort of pottery was at Malaga, where it was introduced by the Arabs or the Moors, who perhaps derived the secret of making it from Persia. The Pisans, who conquered the Balearic Islands in the twelfth century, are said to have brought the manufacture of *Maiolica* to Italy from Majorca. In the fifteenth century it was chiefly made at Faenza, under the names of *pietra* or *terra di Faenza*, whence the French derived the name of "faience," which they applied to it. Unlike porcelain, it is made of common clay, and being only vitrified upon the surface retains a certain degree of porosity. That which was covered with a plumbiferous glaze, silicate of lead, was called "Mezza *Maiolica*." Thanks to the patronage of the Dukes of Urbino, the *Maiolica* made at Urbino, Castel Durante, Pesaro, and Gubbio attained a high degree of perfection during the first half of the sixteenth century, after which it began to decline under the growing taste for porcelain. The names of such distinguished artists as Giorgio Andreoli of Pavia, sculptor and potter established at Gubbio in 1498, whose plates are distinguished for their beautiful, iridescent glaze; of Francesco Xanto da Rovigo, of whose artistic skill the plate No. 7 (signed and dated 1532) is an example; and those of Guido and Orazio Fontana, who worked for Guidobaldo, Duke of Urbino (1540-1560), are connected with the great manufactories above mentioned. The largest platter, No. 6 (subject, the Triumph of Bacchus), and the two richly adorned and painted bottles (gourds), Nos. 8 and 9, are probably the work of Orazio Fontana.

The erroneous idea that Raphael made designs expressly for the *Maiolica* of Urbino and Castel Durante (whence the name *Raphael ware*, often given to it) may have arisen from the fact that some of the designs were taken from his works, or, as has been conjectured, from the substitution of his name for that of Raffaelino del Colle, a painter who worked for Guidobaldo I. della Rovere.

There is little doubt that the great reverence felt for the name of Raphael has contributed to the preservation of many of these fragile treasures, which were greatly valued by the principal families of Urbino and the Romagna.

The Duke Alfonso d'Este, who was himself an amateur potter, contributed not a little to the general use of Maiolica for domestic purposes by substituting it upon his own table for the plate which he was obliged to pawn to meet the expenses of the war which he and the Venetians waged with Pope Julius after the League of Cambray, in 1510. The Ferrarese factories were, for the most part, inactive from this time until 1522, when they again flourished, for we know that the celebrated painters, Giovanni and Battista Dossi, made designs for them in 1524. Duke Alfonso then wrote to Titian to procure for him a number of pieces of Maiolica from Murano. Among them were many Speziera jars used to hold drugs. Of such jars we have specimens in Nos. 14 and 15, probably of Florentine manufacture.

No. 2 is an excellent example of the plates called "amatorii," or marriage plates. Upon these plates lovers caused the portraits of their betrothed to be painted, with such inscription, as "Camilla bella," "Lucia diva," etc., etc., and sent them as presents, laden with fruits, sweetmeats, or confectionery.

We now come to the works of a celebrated artist who combined sculpture and painting with the Keramic art, and originated a new and beautiful branch of decorative art. This was Lucca della Robbia, one of the most eminent of the many great Florentine artists of the fifteenth century. After long practising as a sculptor, he devoted himself to the discovery of a hard enamel which would give terra cotta the durability of marble, and after repeated failures at length attained the desired result about the year 1443. With the true feeling of an artist, Lucca long used a pure white enamel upon the figures which he modelled, and preserved their sculptural feeling by keeping color in his backgrounds and accessories. Thinking, however, that his works might, if more highly colored, be used as substitutes for fresco painting, he afterwards

added other hues than pure blue and green to his palette, and began to color the flesh parts and draperies of his figures. His nephew, Andrea, carried this still further, and under his hands and those of his four sons the distinctive character of pure Robbia ware was gradually lost, until it became an enamelled picture not much above the level of wax-work. The difference between the art in its purity and its decline may be judged of by the "Madonna and Child" attributed to Lucca, and the "Madonna adoring the Infant Jesus," by Andrea or one of his sons. The first is a pure and charming work, which, though by no means one of his best, will give the visitor some idea of the great talent of the artist and the plastic propriety of his work. The second will show him how, by overstepping the bounds which should separate painting from sculpture, a hybrid species of art was produced which had the merits of neither.

#### CASE B.

#### PORCELAIN.

Porcelain was made in Europe as early as the year 1581, under the patronage of Francis I, Duke of Tuscany. The manufactory had but a brief existence of about ten years. The next known attempt was made at St. Cloud, in the year 1695, by the Chicaneau family, where soft paste porcelain was made. In the year 1710 Böttcher had the honor to be the first to discover the art of making hard porcelain in Europe

Böttcher, born in Schleitz, in Prussia, received his education as an apothecary in Berlin, and in the year 1710, suspected of being an alchymist, fled to Saxony. Augustus II hearing of him in Dresden, and supposing that he possessed the secret of making gold, took him under his patronage. It was while searching for the "philosopher's stone" that, in making a crucible in 1705, he discovered the nature of the clay to be Kaoline.\* From that time he continued his experiments until hard porcelain was made.

The manufacture in Vienna was begun under one Stölzel, who fled from Meissen, in 1720. The Höchst pottery, in Mayence, began to make porcelain, under the direction of a workman from Vienna, named Ringler, in 1740. In Fürstenberg, the porcelain manufactory was established in 1750, by Bengraf, who came from Höchst. The establishment in Berlin was first attempted in 1751, but obtained little success until 1761, under Gottskowski.

The Frankenthal manufactory was established in 1755, by Paul Hannüg, who had been forced to leave Sèvres, and was assisted by Ringler, who, finding his secret had been stolen from him in Höchst, quitted that place and offered his services to Hannüg.

The Ludwigsburg factory was established in 1758, by Ringler, under the patronage of the Duke of Wurtemburg. In the same year the first manufactory in Thuringia was commenced.

In Russia, two manufactories were begun about the year

\* KAOLINE, the Chinese name for porcelain earth, is composed of silica, alumina, and water (hydrous silicate of alumina). It is produced by the disintegration of the crystalline mineral, felspar, through the action of the atmosphere on granite and other rocks that contain it.

Felspar, the *Petuntze* of the Chinese, consists of silica, alumina, and potash or soda, or both, and in the disintegration referred to it loses all the potash and soda and part of the silica, leaving only the remaining silica and the whole of the alumina, with which a small amount of water becomes combined. The kaoline resulting has an average composition, as follows:—

Silica . . . . .	47 per cent.
Alumina . . . . .	40 "
Water . . . . .	13 "

1756. In Holland, porcelain manufactories were established at Weesp, in 1764; at the Hague, in 1778; and at Amstel, 1782.

The Copenhagen works were begun in 1760. In Sweden they began to make porcelain, in the old manufactory of pottery, in Rörstrand, in 1735, and at Marieberg, in 1759.

Porcelain was made in France, after the first attempt at St. Cloud, in Vincennes, in 1740-1745. The works were removed to Sèvres, in 1756. The Chantilly works were commenced in 1735; Sceaux, 1751; Strasbourg, 1752; Niderviller, 1765; Marseilles, 1766; Lille, 1785; Belleville, 1790.

In Italy, after the manufacture under the Medici ceased, there was no porcelain made until 1726, when one Francesco Vezzi established a manufactory in Venice, and was followed in 1735 by the Marquis Ginori, at Doccia, near Florence. In 1736, at Naples, the Capo di Monti manufactory was begun, under the patronage of Charles III.

In Spain, the only manufactory was that of Buen Retiro, near Madrid, established by Charles III with workmen brought from Naples.

In England, the first porcelain works were erected at Bow, about 1740; the Chelsea, in 1745; Derby, 1750; Worcester, 1741; Caughley and Lowestoft, 1756; Plymouth, 1760; Bristol, 1772.

Josiah Wedgwood began his pottery works in 1752, but never made porcelain.

The collection here exhibited, though not large, is rich, especially in specimens of Chinese art. It is loaned chiefly from the collections of Mrs. A. Burlingame, Mr. G. W. Wales, Mrs. W. B. Swett, and Mr. D. O. Clarke. Especially noticeable are, in the first compartment,—

TALL JAR, MING DYNASTY. *Lent by Dr. Geo. R. Hall.*

WHITE OVIFORM JAR. *G. W. Wales.*

TWO OLD AND VERY FINE MING VASES, loaned by *Mrs. Swett*, from the Heard Collection.

**ALTAR CUP**, white, very old and rare. *G. W. Wales.*

**FIVE-FINGERED ROSADON.** *G. W. Wales.*

**BROWN BOWL, CRACKLED.** *Mrs. Burlingame.* This appearance of crackle is not the result of accident or age, but can be produced artificially.

In the second compartment,—

**IMPERIAL DRAGON VASE**, tall, green; an unique specimen.  
*D. O. Clarke.*

**CELADON POT**, three handles, reign of Yuang-tching,  
1725-1735. *Mrs. Burlingame.*

**MOTTLED BLUE JAR, RED DRAGON ON LIP.** This exquisite specimen was given by Mr. Geo. B. Dorr.

**TWO VASES, WITH FLOWERS IN HIGH-RELIEF.**

**GREEN DRAGON BOWLS AND JAR.** *G. W. Wales and Geo. Tyson.*

**VASES OF RICH COLOR.** *J. W. Paige.*

**JAR, CURIOUSLY MOTTLED** and painted. *Miss Brewer.*

**ANOTHER** of same fabric. *D. O. Clarke.*

**TWO BRICKS FROM TRE PORCELAIN TOWER OF NANKIN.**

Tradition ascribes a fabulous ape to the original tower; it was rebuilt for the second time in the fifteenth century, and was destroyed in the Taeping rebellion. One is enamelled, the other of plain white porcelain. *Geo. Tyson and D. O. Clarke.*

**ENAMELLED EWER**, of unusual form and decoration. *Mrs. Burlingame.*

In the third compartment,—

**ROSADON VASE**, Japanese, rich color, and **TWO CRACKLED VASES.** *W. Allan Gay.*

**CELADON JAR FLEURÉE.** *G. W. Wales.*

**PALE BLUE VASE**, centre of lowest shelf. This exquisite color is blown through a tube covered with fine gauze. The bubbles of color burst on striking. Presented by *Geo. B. Dorr.*

The fourth compartment is filled with BLUE NANKIN ware, lent mostly by *Geo. W. Wales*. The tall vase on the upper shelf is lent by *Mrs. Swett*. The RICE-PORCELAIN TEAPOT on lower shelf, by *Mrs. Burlingame*. It bears the date of the reign of Kien Lung, 1736-1795.

The fifth compartment contains,—

On upper shelf,—

MARIEBURG, RÖSTRAND, HAGUE, AND ST. PETERSBURG.

*G. W. Wales.*

COPENHAGEN. For sale. *Mrs. Charles C. Little.*

On middle shelf,—

DRESDEN. *Mostly by G. W. Wales.*

CUP AND SAUCER, flowers in high relief. *Mrs. R. C. Greenleaf, Jr.*

On lower shelf, — (M.F.A.)

DRESDEN CASKET. *Harleston Deacon.*

BERLIN AND VIENNA. *G. W. Wales.*

In sixth compartment,—

Upper shelf,—

CAPO DI MONTI, BUEN RETIRO, and a number of old ROUEN.

*G. W. Wales.*

A COPY, by Minton, of a HENRI DEUX salt-cellar. The original is now in the S. Kensington Museum. Presented by *G. W. Wales*.

TEA-SET, SÈVRES, "presented by the French government to Miss M. F. Curtis, distributor of funds, sent out from Boston for relief of sufferers by the German war, 1870, 1871."

BASES OF CANDELABRA, SÈVRES. *Francis Brooks.*

SÈVRES AIGUIÈRE. *G. W. Wales.*

S VRES VASES, GROS-BLEU. *Harleston Deacon.*

In seventh compartment,—

**DELFT**, on upper shelf.

**WEDGEWOOD**, one piece loaned by *Miss Parkman*, Wedgewood, Turner, and **CHELSEA** **FULDA** AND **OLD WORCESTERSHIRE** wares. *G. W. Wales.*

On lower shelf,—

**CROWN DERBY**, several pieces. *Lent by Francis Brooks.*

**THE** exquisitely delicate **PLATE**, “*Pâte sur pâte*,” designed and decorated by Solon, at the **MINTON** Works, Stoke-upon-Trent, was one of a half-dozen exhibited at Vienna. The others were bought for European museums. This was presented by *G. W. Wales.*

**LOWESTOFT**, **BRISTOL**, **OLD CHELSEA**, etc.

In the flat compartments in front, among others, are—

**SEVERAL FINE PIECES JAPANESE PORCELAIN**, especially **CUP AND SAUCER** decorated with the tea-flower. *G. W. Wales.*

**CUP AND COVER**, white, imperial dragon in red. The surface is especially noticeable. From the emperor's summer palace. *Lent by G. W. Wales.*

**TWO BOWLS RED DRAGON.** *Mrs. Swett.*

**ROSE CRACKLE CUP AND COVER.** *G. W. Wales.*

**TEA-SET OF OLD CHINA, RAISED FLOWERS.** *J. W. Paige.*

**SNUFF BOTTLES.** *Loaned by Mrs. Burlingame.* The black one is of the reign of Ching-Wha, 1465–1468.

Above the case are three fine specimens of **CELADON**, loaned by *Mr. Wales* and *Mr. Clarke*.

THE GRAY COLLECTION OF ENGRAVINGS, made by the late Francis C. Gray. Loaned by Harvard University.

A number of prints are exhibited in Stalls; these will be changed from time to time. Opportunity will be given to students, on making appointment with the curator, to examine it more particularly.

The ENGRAVINGS bequeathed by Mr. CHARLES SUMNER are hung upon the walls.

### CARTOON.

CHRIST THE HOPE AND SUPPORT OF THE AFFLICTED. Paul Delaroche. See Isaiah, ch. 41, v. 13. "For I, the Lord thy God, will hold thy right hand, saying unto thee, Fear not; I will help thee."

The first drawing of this composition was made at Eisenach, in 1847, and given by the artist to the Duchess of Orleans. In 1851 Delaroche painted a sketch from a tracing of the original drawing (6 x 8 inches), which was purchased at the sale of his works at Paris in 1857 for \$1,550, and is now in the Belmont Gallery at New York. At the time of his death, Delaroche had begun to put the composition upon canvas, figures life-size. Property of the Athenæum.

NINE SPECIMENS OF CHINESE ENGRAVING. Presented by Mr. A. A. Hayes, Jr.
